

Highly Purified Human Complement Component C3c

PRODUCT CODE : AJ 3032

SOURCE : Pooled normal human plasma/serum that has been tested negative for HBsAg, anti-HIV-1/2 and anti-hepatitis C on a single donor basis.

PRESENTATION : Supplied lyophilised from sodium phosphate buffer, pH 7.2, containing 0.15 M NaCl.

PURITY : Nominally >96% of the protein is Complement C_{3c}

ANALYSIS : PAGE shows one band corresponding to C_{3c} molecular weight.

Cellulose acetate electrophoresis shows one band with β_2 -electrophoretic mobility.

Protein determination by the method of Lowry and by optical density using

$$E_{1\text{cm}, 0.1\%}^{280\text{nm}} = 0.97$$

Radial immunodiffusion (RID) using Behring standard confirmed OD results.

RECONSTITUTION : Reconstitute with deionised water.

STORAGE : +2° to +8° C
