

Highly Purified Human Fatty Acid Binding Protein (FABP)

PRODUCT CODE : AJ 3129

SOURCE : Human heart tissue.

The initial tissue extract is tested negative for HBsAg, anti-HIV-1/2 and anti-Hepatitis C.

PRODUCT PRESENTATION : The product is supplied lyophilised from 0.02M ammonium bicarbonate. It may contain traces of buffer salts.

ANALYSIS : SDS-Polyacrylamide Gel Electrophoresis shows one band with a molecular weight of approximately 14kD which corresponds to that of FABP.

Total protein concentration is determined by the method of Lowry and by Optical Density (OD) at 280nm.

PURITY : Nominally greater than 96% of the protein is Fatty Acid Binding Protein (FABP).

RECONSTITUTION : Use of a phosphate buffer containing 0.15M NaCl is recommended.

STORE : +2° to +8°C.
